

POLITICS NOW IN FULL SWING

Nominations Have Been Made
and the Various Parties Have
Skirmish Lines Out.

STANDARD OIL HEARING

SENSATIONAL MURDER TRIAL
THIS WEEK.

Nominations having been made by the party conventions in various states the political campaign is expected to develop greater activity and become more interesting this week. In addition to the congressional contests governors are to be elected in several states, among them New York and Massachusetts. In these two states the Democrats have nominated candidates who were opposed by certain conservative leaders in the party, creating sensations in the states not unlike that in national politics when Bryan was nominated for the presidency. In each of these states the canvass undoubtedly will be extremely active and be followed with intense interest from until election.

Standard Oil Hearing.
On Tuesday the hearing of the Standard Oil company, charged with violation of the anti-trust laws, will begin in the probate court at Findlay, O. This is the proceeding in which John D. Rockefeller has been summoned to appear.

A national convention has been called by General Elihu A. Tamm, president of Ecuador, who overthrew the Garcia administration in January last, to meet at Guayaquil Oct. 9 for the purpose of promulgating a new constitution and for the election of a president of the republic. By the present constitution of Ecuador, 1887 and 1897, the executive is vested in a president, while the legislative power is given to a congress of two houses, the members of which are elected by adults who can read and write.

Sensational Murder Case.

A case that promises to arouse more than usual interest is scheduled to begin at Tom's River, N. J., on Monday, when Dr. Frank Brouwer will be put on trial charged with the murder of his wife. It is alleged that Brouwer caused his wife's death by giving her ground glass and arsenic while ostensibly treating her for a sudden and severe illness.

The annual meeting of the national Afro-American council will be held in New York on Tuesday, Wednesday and Thursday of this week. The call for the friends and working for the absolute undoing of all discrimination against the race that this meeting is to be called.

JAPANESE WILL CONTROL SOUTHERN MANCHURIA

London, Oct. 8.—Dispatches from Tokio declare that the bonds of the South Manchurian railroad have been over-subscribed many times, but that there is no Chinese applications. Explaining this fact the Peking correspondent of the Times says that although China was invited to participate, she did not do so because there were no funds available for the investment, and none could be had without recourse to a foreign loan, which policy and the fear of foreign complications both forbade. The railroad, therefore, the correspondent says, although nominally Chino-Japan, will be exclusively Japanese, and give Japan effective control of southern Manchuria.

BELGIAN OFFICERS EMPLOYED BY SULTAN

Brussels, Oct. 7.—According to a dispatch from Constantinople published in the Petit Bleu, the sultan purposes to reorganize the Turkish gendarmerie in the provinces of Smyrna, Beirut and Adrianople, under the Belgian army officers who have hitherto been employed in Macedonia. These officers have been re-engaged, while the Swedish and Norwegian officers in Macedonia have been dismissed.

DESTINATION SECRET.

London, Oct. 8.—The Daily Mail this morning declares that Gabriel Estipoff, accompanied by the wife of General Oushakoff, sailed from a British port last Saturday for a distant secret destination.

LOSS \$100,000.

Chicago, Oct. 7.—The plant of the Morgan Blind & Sash company here was destroyed by fire tonight. Loss \$100,000.

DOWIE SEES THE MASTER

"First Apostle" Has a Vision in
Which He Is Commanded to Give
Up the Mexican Project.

Chicago, Oct. 7.—John Alexander Dowie's plan for a Mexican colony was abandoned in obedience to a command received by Dowie in a vision that came to him last Friday night and that lasted five hours, according to an announcement made today by Deacon Arrington, one of Dowie's followers, who has remained loyal to the master and heard his voice. He has commanded, he said, to give up the Mexican project and seek the glory of Zion elsewhere. Dowie then commissioned Deacon Arrington to come to Chicago and raise \$1,000,000 "for God and Zion."

GORED BY AN ELK.

Vale Senior Nearly Killed by Infuriated Animal.

New Haven, Conn., Oct. 7.—Chauncey E. McCormick, a German consular agent at Westville today after a fierce struggle, was gored by an elk in a private park at Westville today after a fierce struggle. He was walking with a companion, F. H. Revel, Jr., of Evansville, Ill., also a senior, when the buck started after them. McCormick escaped. The animal attacked McCormick, who grasped its antlers, but was thrown to the ground. He was struck twice by the elk, receiving a wound in the side. He managed to escape by climbing a tree. When rescued he was almost unconscious.

CRIMES COMMITTED BY MACLAIN'S HORDE

London, Oct. 8.—The Tangier correspondent of the Times says:
The recent assaults upon Europeans, including the German consular agent at Morocco City, were committed by followers of MacLain and are a direct result of the sultan's astounding infatuation for this uneducated and fanatical sorcerer, who hates everything European.

TROUBLE AT GUINES.

Disarmed Cuban Rebels Use Machetes on Policemen.

Havana, Oct. 7.—A delegation from the town of Guines came into Havana, and reported to General Funston that a party of Asbert's disbanded rebels had entered Guines and attacked some police who have been suspended under pay since the arrival there of American marines. Several policemen were badly wounded with machetes, and the rebels threatened to kill the entire force. The people of Guines are in a state of considerable alarm. General Funston ordered Captain Echeverria of the marines to cooperate with Captain Figueroa of the rural guards and to exercise a special vigilance against the negro band which is being held in Guines.

VESSEL COMPELLED TO RETURN TO PORT

Port Townsend, Wash., Oct. 7.—The barkentine Planter, Captain Murchison, which left Everett eight days ago, bound for Manila, returned to port today water-logged and in badly damaged condition because of a storm encountered off the Columbia river. As the storm increased in violence the rising began going by the board and the Planter soon became unmanageable. In the height of the gale it was discovered that the vessel was leaking. The pumps made no headway against the rushing water, and her hold rapidly filled, flooding the forecastle, cabins and galleys. The ship stores were under water, and while the crew were trying to work their way back to the straits it was necessary to secure provisions from below with the aid of a net.

SHEPARD NOT TO BLAME.

New York, Oct. 7.—Justice Remsen, one of the cornerstones of North Hempstead, L. I., said tonight that he did not see how it would be possible to hold Elliot P. Shepard for the killing of Kurt A. Gruener of Passaic, N. J., in the Vanderbilt cup race yesterday. After examining several witnesses he held that Mr. Shepard was in no way to blame.

SAILED FOR HAVANA.

Newport News, Va., Oct. 7.—With two squadrons, headquarters and band of the Fifteenth cavalry aboard, the army transport Panama sailed this morning for Havana. Assistant Paymaster General Charles T. Whipple left on this ship, taking with him \$2,000 to pay off the soldiers now in Cuba. The transports Monterey and Niagara will get out of port tomorrow with two battalions of the Seventeenth infantry and the First battalion of the Twenty-eighth infantry.

NEW CABINET PLACE.

Dover, England, Oct. 7.—In an address before the Dover chamber of commerce last night the president of that body announced his belief that the government would create a ministry of commerce in the autumn and that the first minister would be Sir William Henry Richard, M. P.

SOCIALIST MANIFESTO.

St. Petersburg, Oct. 7.—The Social Democrats of Cronstadt have issued a manifesto to the soldiers of the garrison against isolated mutinies and urging them to await the general rising.

HOSTILE UP NORTH.

St. John's N. F., Oct. 7.—Washington dispatches received here stating that the British and American governments have arranged a redoubtable regulation bearing fishery in these waters and giving what are assumed to be the correct terms of the arrangement, evoke bitter criticisms on the part of the press and the public.

FREE NEXT JANUARY

Regulations Governing the De-
natured Product Issued by
Commissioner Yerkes.

INGREDIENTS TO BE USED

OBJECT TO BE ATTAINED BY
THE LAW.

Washington, Oct. 7.—Mr. Yerkes, commissioner of internal revenue, with the approval of the secretary of the treasury, today issued the departmental regulations controlling the making of denatured alcohol, the handling of the same and its uses.

These regulations follow and render effective a law enacted by congress at its last session, which provides for the withdrawal from bond tax free of domestic alcohol when the same is rendered unfit for beverage or liquid medicinal uses by the admixture of denaturing materials and for the use of the denatured alcohol in the arts and industries, and for fuel and power.

The law becomes effective Jan. 1, 1907. This legislation is in harmony with similar enactments adopted by nearly all foreign countries.

Object of the Law.

"The prime object to be attained by this type of legislation is to furnish, for purely domestic uses, and also for what is called industrial revenue, heat, light and power, cheap alcohol with the hope thereby that there will be a reduction of expenses in the departments."

"This denatured alcohol will be a competitor with illuminating oil, gasoline and coal. It will also furnish to manufacturers who use alcohol in the products of their factories, a cheaper and more reliable fuel. This amounts to about \$2 per wine gallon of alcohol at 190 degrees proof. It is believed that the benefit derived from the people by this legislation and such other legislation of this kind, such as the denaturing of alcohol, will be a very great one."

Guarding Against Fraud.

"In preparing the regulations it was essential to adopt rules that would prohibit as far as possible the perpetration of any and all frauds against the revenue of the government by the reclamation and repurification of denatured alcohol through re-distillation or other process, and the removal of the denatured ingredients added, and restoration of the alcohol to its original condition for beverage and potable purposes."

"To secure these ends it will be necessary to use articles for denaturing purposes and also use such ingredients that are most difficult to separate from pure alcohol by chemical or other processes. In determining the ingredients to be used, the cost of the same is of great moment, for to render this new legislation of practical value it is necessary for the denatured products to pass into the hands of the consumer at as low a price as can be secured."

Two General Classes.

"Under the regulations now issued, alcohol of 190 degrees proof is free from the tax of \$1.98 per wine gallon after being denatured by the use of either some general denaturing material or some special denaturing material adapted especially to the use of certain manufacturing interests. There will, therefore, be two classes of denatured alcohol, first, alcohol completely denatured, which will pass into general use for general consumption, can be purchased at stores without limiting conditions as against the private consumer, and second, 'specially denatured,' in which the material demanded by the various industries is used, and with limitations as to the use of this class, confining it to the special manufacturing industry for which it is prepared."

"This specially denatured alcohol will be kept under strict surveillance and governmental supervision."

Wood Alcohol and Benzoin.

"For the completely denatured article, ten per cent of the distillery refuse and one-half part of benzoin will be added to one-hundredth part of ethyl alcohol; in other words, to every gallon of ethyl alcohol will be added ten gallons of wood alcohol and one-half gallon of benzoin."

"The denaturing process will be accomplished on the distillery premises, where the alcohol is produced, in special bonded warehouses designated and set aside for denaturing purposes and for the storage of denaturing materials. These buildings and the operation itself will be under direct governmental inspection and control."

"After the alcohol has been denatured it is removed from the distillery premises and then becomes a subject either of general distribution, if completely denatured, or for distribution to the various establishments whose special denaturing formula have been approved by the government."

Will Supplant Wood Alcohol.

"Denatured alcohol will supplant very largely the consumption of wood alcohol for both domestic and industrial purposes, as it will be cheaper."

"While the price of the completely denatured product cannot be definitely stated, it is believed that it will not be more than 35 cents a gallon."

"With regard to the specially denatured alcohol, the price naturally will vary according to the cost of the denaturing ingredients selected to meet the necessities of the manufacturing industry, and where it is made perfectly apparent to the department that the industrial interests involved cannot use commercial denatured alcohol by reason of the presence of wood alcohol or benzoin. In that case, the price will be determined by the department, which will all be thoroughly examined in the departmental laboratories, and if it is determined that the requirements of the law are met then their use will be permitted."

AMERICA IS BACKWARD.

Text books on Esperanto are published in several languages, but, according to the writers on the subject, America lags in the movement. This is accounted for by the fact that the country is so large as to be self-sufficient in such matters largely. But since the Spanish-American war, and the leading universities are taking it up, it is thought to be on the road to practicality here also.

Speaking of the movement, Professor MacCloskie says: "He is a Roman Catholic gentleman of devout spirit, simplicity of heart, and a brother to all men who love the Savior." Indeed, the movement has found favor perhaps more among religious men than among any other class as yet. This, perhaps, because misunderstanding is so common. It is especially claimed that Esperanto is not designed to supplant any other language. If as some enthusiasts think, English is some day to be the universal language, Esperanto will have served its time and will be done away with. This Kara Ingevo (our language), as its name is given, is only a bridge to cross the gulf between the nations.

Salt Lake Club to Investigate
Esperanto, the Universal
Language.

FOR INTERNATIONAL USE

JUST NOW IT IS ALL THE RAGE
AMONG LINGUISTS.

Salt Lake is to have a class in the study of Esperanto, whose advocates are claiming so much for its practicability and adaptability all over the world. The Monday Night club, which has been taking miscellaneous studies some time past, has taken a step, under the direction of Professor George C. Wise, professor of languages at the University of Utah, toward beginning the study. Hereafter a part of each meeting will be devoted to the study and practice of the language, and if that its advocates claim for it is true it will take only a few weeks to become proficient in it.

Esperanto is the rage just now with linguists and students of ethnology the world over. It is indeed to the world a new language, designed to become a medium of communication between the educated peoples of various tongues. Unlike Volapuk, it is established on the basic principles from which the leading languages of the earth are derived, and is easy to learn and to spell, while Volapuk presented difficulties in both ways.

Perhaps no movement among scholars has been so successful in spreading its enthusiasm to back it than this Esperanto idea, for it may no longer be true, as was said by the Russian physician, Dr. Zamenhof, who is the inventor of the language, but it has been taken up by scholars and men of letters as being so eminently practical for which it is designed, and it has been adapted for the purpose of giving a brief history of the movement and also giving the main principles of the language, such as such a word may be used in connection with a language appeared last January.

Monthly, written by Dr. Zamenhof, who claims that he is not an Esperantist but only a student. He sets forth the main difficulties encountered in the study of the language, and the means and the overcoming of the prejudice created by the failure of Volapuk. He also points out the success of the movement in Germany, France and England, notably W. J. Stead, who gave the real value of the language to the English-speaking world, and the success of the movement in Germany, France and England, notably W. J. Stead, who gave the real value of the language to the English-speaking world, and the success of the movement in Germany, France and England, notably W. J. Stead, who gave the real value of the language to the English-speaking world.

Students Converse in It.

The congress of Boulogne, held in August of 1905, was the first and at the same time the most convincing proof of the real value of the language. It was to this congress that the students of the language, Schinz was composed of students of the language. Schinz was composed of students of the language. Schinz was composed of students of the language.

"Twelve hundred delegates, from twenty-two different countries, had gathered, and while it was possible to tell the people of various nationalities by their accents, there was no trouble in understanding every one present. As it was expected that the congress would be a success, there was no trouble in understanding every one present. As it was expected that the congress would be a success, there was no trouble in understanding every one present."

"For a whole week speeches were made by representatives of the twenty-two nations; all their discussions were conducted in Esperanto. In the evening they were given a lesson in the language. The characters were taken by seven countries. Of the nations represented, the men were Russian and one was a Swede; the men were English, Belgian, Norwegian and French."

"The general principle upon which Dr. Zamenhof has worked is this: To eliminate all that is accidental in the construction of a language, and that which is common to all. In consequence, strictly speaking, he invents nothing; he builds entirely upon what has been in existence for a long while."

Try to Read This.

After giving a brief description of the leading sounds and the principles which govern, he concludes with the statement that every student of the language should read the paragraph in the new language, and gives the following:

"La internacia lingvo estas fakte nova, de la personoj nemulte instruitaj. Unu horo suficas generale por lerni la tutan gramatikon, kelkaj tagoj por legi, kelkaj semajnoj por skribi. Ĝenerale, estas efektive tre simpla, fleksebla, bonsona kaj vere internacia per siaj elementoj. Kun malgranda kunkado de lingvo ne havas intencojn malforigita. Ĝenerale, estas efektive tre simpla, fleksebla, bonsona kaj vere internacia per siaj elementoj. Kun malgranda kunkado de lingvo ne havas intencojn malforigita."

"Ĝenerale, estas efektive tre simpla, fleksebla, bonsona kaj vere internacia per siaj elementoj. Kun malgranda kunkado de lingvo ne havas intencojn malforigita. Ĝenerale, estas efektive tre simpla, fleksebla, bonsona kaj vere internacia per siaj elementoj. Kun malgranda kunkado de lingvo ne havas intencojn malforigita."

Translation.

The international language Esperanto is easily learnable, even by (of) people not much educated. One hour suffices generally to (for) learn the whole grammar, and a French (English) day to read some weeks to write. Esperanto is effectively very simple, flexible, well-sounding and very international by its elements. With (a) small (not large) quantity of radicals, one can make (a) very great number of words, thanks to the practical system of prefixes and suffixes. This language has not the intention to weaken the natural language of any people. It must serve for the international relations, and for all the world interest the whole world. Esperanto helps the sciences, commerce and journeys."

In the current number of Harper's Weekly appears another article called "The Strength of Esperanto," written by George MacCloskie, L.L.D., D. Sc., of Princeton university. He commends the movement and says:

"The surprising thing is that the new language is already beyond the probation stage even in France, which has not been prejudiced in its favor. The British Esperantist of August reported at length the examinations in Esperanto, appointed and subsidized by the London chamber of commerce. This means business."

AMERICA IS BACKWARD.

Text books on Esperanto are published in several languages, but, according to the writers on the subject, America lags in the movement. This is accounted for by the fact that the country is so large as to be self-sufficient in such matters largely. But since the Spanish-American war, and the leading universities are taking it up, it is thought to be on the road to practicality here also.

Speaking of the movement, Professor MacCloskie says: "He is a Roman Catholic gentleman of devout spirit, simplicity of heart, and a brother to all men who love the Savior." Indeed, the movement has found favor perhaps more among religious men than among any other class as yet. This, perhaps, because misunderstanding is so common. It is especially claimed that Esperanto is not designed to supplant any other language. If as some enthusiasts think, English is some day to be the universal language, Esperanto will have served its time and will be done away with. This Kara Ingevo (our language), as its name is given, is only a bridge to cross the gulf between the nations.

THOUSANDS GATHER AT MORMON CONFERENCE

Continued from Page 1.

In adjourning the conference, President Smith made a brief address, in which he declared that an excellent spirit had prevailed throughout its sessions. He paid high tribute to the men under him and said the Lord spoke had called them to their positions had made no mistake in doing so.

President Smith referred to the life of the Prophet Joseph Smith and declared that the time would come when he would be honored by as many people in the world as now honor the name of Jesus Christ. After singing, the conference adjourned. President Smith announced that the afternoon organ recitals which have been given two days each week during the summer months would be discontinued for the present.

Overflow Meetings.

At the overflow meeting held in the Assembly hall yesterday afternoon Reed Smith presided, but made no speech. The speakers were Richard W. Young, president of Ensign state; Nephi Pratt, president of the northwestern states mission, and J. W. Miller, president of the Utah mission. The overflow meeting was held in the Assembly hall, and the overflow meeting was held in the Assembly hall.

The general authorities of the church will hold a meeting in the Assembly hall at 10 o'clock this morning. The overflow meeting was held in the Assembly hall, and the overflow meeting was held in the Assembly hall.

Taft HAS REFUSAL OF PLACE ON BENCH

Washington, Oct. 6.—The president told some of his callers today that the matter of filling the vacancy on the United States supreme court was still under consideration by him, and that no conclusion would be reached until Secretary Taft had returned to the United States and there was an opportunity for consultation with him.

Various names have been mentioned to the president for the place in the event that Secretary Taft declines the position, and these include Judge Horace H. Lurton of the Sixth judicial circuit court, Attorney General Moody and other persons now in the federal judiciary.

PUMPKIN VINE'S RECORD.

Veracious Tale of Chase After a Water Wagon in Western Desert.

(Chicago Evening Post.)

"Yes," said the man with the incandescent nose, "I have observed that the pumpkin vine is a very grower, also that the wild cucumber vine can at times set a new record for long distance speed, but for twentieth century limited schedule time commend me to the old reliable pumpkin vine."

"I have seen pumpkin vines grow clear across the road in a single night," agreed the fan with the ingrowing mustache.

"Across the road?" sniffed the man with the incandescent nose. "Is that all? Why, our water wagon came from the pumpkins. I have seen it grow clear across the road in a single night," agreed the fan with the ingrowing mustache.

"That's what I said," and the eyes of the man with the incandescent nose grew dreamily reminiscent. "I remember one fall when I was on the water wagon."

A hoarse and incredulous laugh from the man with the ingrowing mustache interrupted him for a moment, but he went on with dignity:

"I was hauling water for a gang of tracklayers, and I had to drive forty-nine miles across the desert to get it. I drove back and I took a good two days for the trip. You know a pumpkin will simply run like a jack rabbit if it smells water. Well, sir, one morning I was starting back with the water wagon, and a pumpkin vine sprang through a hedged wire and started after me. I knew if it got its tendrils wrapped around the wheels it would be the end of that trip, so I whipped up the horses and eluded it. But the next day it was bigger than ever and it mightily near caught me before I was able to turn a corner around a bluff to escape it. The third trip it lay in wait for me and simply made the sand fly as it sped along in my wake. I whipped up my horses, but it kept going back and I took a good two days for the trip. You know a pumpkin will simply run like a jack rabbit if it smells water. Well, sir, one morning I was starting back with the water wagon, and a pumpkin vine sprang through a hedged wire and started after me. I knew if it got its tendrils wrapped around the wheels it would be the end of that trip, so I whipped up the horses and eluded it. You know a pumpkin will simply run like a jack rabbit if it smells water. Well, sir, one morning I was starting back with the water wagon, and a pumpkin vine sprang through a hedged wire and started after me. I knew if it got its tendrils wrapped around the wheels it would be the end of that trip, so I whipped up the horses and eluded it. But the next day it was bigger than ever and it mightily near caught me before I was able to turn a corner around a bluff to escape it. The third trip it lay in wait for me and simply made the sand fly as it sped along in my wake. I whipped up my horses, but it kept going back and I took a good two days for the trip. You know a pumpkin will simply run like a jack rabbit if it smells water.
